PROFESSIONAL SUMMARY

Final-year M.Tech Software Engineering student with a foundation in full stack web development, data analytics, and product-focused engineering. Hands-on experience shipping production-deployed applications with Next.js, Node.js, TypeScript, and PostgreSQL, plus applied work in computer vision and generative AI. Seeking a software engineering internship where analytical problem solving and end-to-end ownership drive measurable impact.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks and Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, OpenCV, REST APIs

Databases: PostgreSQL, Supabase, Firestore

AI and GenAI: Generative AI development, prompt engineering, agentic AI, Retrieval-Augmented Generation (RAG), Gemini API, GitHub Copilot

Data and Security: Real-time data pipelines, data analytics, backend security, role-based access control (RBAC)

Tools and Platforms: Git, GitHub, Vercel, VS Code, Linux fundamentals, Agile collaboration

PROFESSIONAL EXPERIENCE

Software Development Intern

May 2026 - July 2026

Farida Shoes Pvt. Ltd., Ambur, Tamil Nadu

- Engineered an automated, non-contact heel height inspection system using Python, OpenCV, and Node.js, replacing a fully manual production-line quality check.
- Developed dynamic image preprocessing and self-calibrating measurement algorithms to overcome variable factory-floor lighting and part placement, sustaining high detection accuracy.
- Partnered with manufacturing stakeholders to translate physical QA tolerances into software validation rules, delivering a prototype approved for live production integration.

PROJECTS

MeltedStories - Quick-Commerce Platform

Next.js, Supabase, PostgreSQL, Tailwind CSS

- Built a multi-branch architecture in Supabase with localStorage persistence to scope employee dashboards and order queues by store location.
- Designed a unified component and notification system shared across the customer menu, admin, and staff portals for consistent UX and faster feature rollout.
- Hardened the admin surface by migrating the staff portal to a custom non-indexed route, mitigating automated bot discovery and unauthorized access.

ScappyV - AI-Powered Campus Management Platform

Node.js, TypeScript, Express.js, Supabase, PostgreSQL, Gemini API

- Engineered an AI triage engine using the Gemini API to autonomously parse, categorize, and route infrastructure tickets to the responsible department without manual sorting.
- Developed an admin assistant powered by Retrieval-Augmented Generation (RAG) to execute administrative intents and query live database telemetry in natural language.
- Implemented a role-based portal architecture enforcing strict email domain validation and session isolation across student, staff, and admin user types.

EDUCATION

M.Tech Integrated, Software Engineering

2022 - 2027

Vellore Institute of Technology, Vellore, Tamil Nadu | CGPA: 7.84 / 10

Higher Secondary (Grade 12): 75.8% | Secondary (Grade 10): 93.4%

CERTIFICATIONS AND ACHIEVEMENTS

- Cybersecurity Certification**, Infosys Springboard - [View](#)
- Qiskit Developer Certification**, IBM Quantum - [View](#)
- HonestHackerz Master Certificate** - ethical hacking and continuous security diagnostics - [View](#)

- **3rd Place, CyberVerse Hackathon** - [View](#)
